Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to a process of making, classified in class 505, subclass 212.

Group II, claim(s) 18-23, drawn to a product, classified in class 428, subclass 702.

Group III, claim(s) 24-25, drawn to the process of using, classified in class 505, subclass 211.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group II requires a certain magnetic property of the product which is not required by groups I or III.

During a telephone conversation with David Cushing on 10/29/02 a provisional election was made with traverse to prosecute the invention of Group II, claims 18-23. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-17 and 24-25 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Drawings

The drawings are objected to because they contain labeling which is not in English. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481

Art Unit: 1725

(Bd. App. 1949). In the present instance, each of claims 18 and 21-23 state broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation. For instance, claim 18 recites the broad recitation of a maximum remanent induction of "at least 1100 mT", and the claim also recites "preferably of at least 1200 mT" and "even more particularly preferred of at least 1300 mT" and also "above all of more than 1400 mT" which are several narrower statements of the range/limitation. Claims 21-23 have similarly claimed ranges. The claims must be corrected to include one and only one claimed range.

Claim 19 recites the limitation "the plate" in line 5. There is insufficient antecedent basis for this limitation in the claim. If this is meant to refer to the disc of line 3, either term may be used so long as it is consistent. In addition, claim 19 is generally unclear as to which limitations are required in which combination to satisfy the claim. This is due to the use of several limitations joined by "or". The claim reads essentially as requiring A or B, C, D, or E "consting substantially of one or more segments is substantially in line with" F/G, or H, or I. It is not immediately clear which combinations of A though I are defined by the claim.

Claims 18 and 20 are unclear because of the use of "(Y/Rare Earth)" in both claims and "or/and" in line 3 of claim 20. Currently claim 18 is unclear as to whether both Y AND a rare earth selected from Y, La, Ce...or just Y will meet the claim requirements. This is further complicated in claim 20 which states that "Y or/and Rare Earth may be in excess" because this does not clarify whether both must be present and whether both must be in excess. Clarification is required.

Allowable Subject Matter

Claim 18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:
The prior art of record does not teach or suggest a (Y, RE)BCO superconducting material where RE is selected from the group consisting of La, Ce, Pr, Nd, Eu, Gd, Tb, Dy, Ho, Er, Tm, Yb, and Lu, which has a maximum remnant induction at 77K and 0 T of at least 1100 mT.
